Date	[24/06/2024]
Version	[1.0]

Project Acronym	NEPHEWS
Full title	NEutrons and Photons Elevating Worldwide Science
Project ID	101131414
Lead beneficiary	EuXFEL

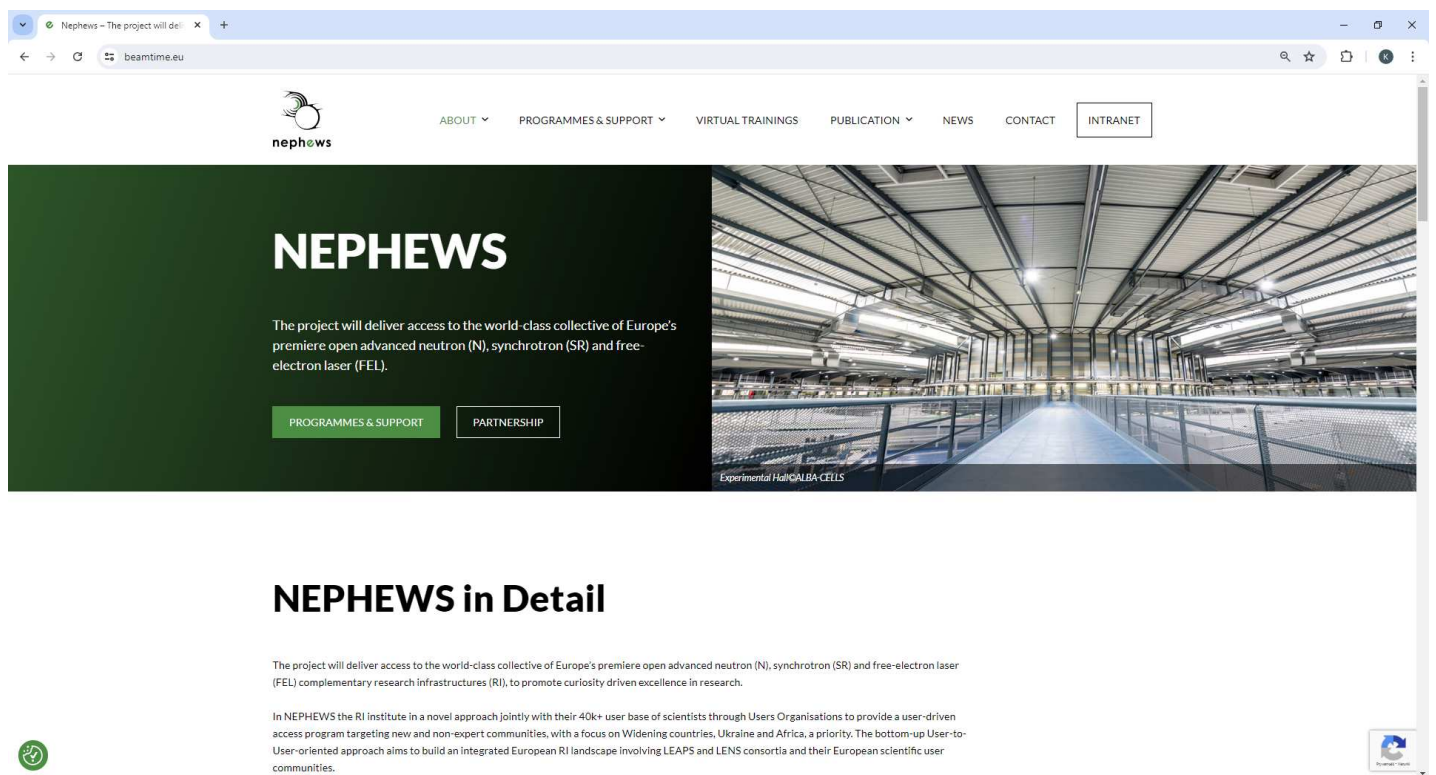

The NEPHEWS project website is available at www.beamtime.eu.

Its substantive content was developed by the project team, and the website itself was prepared and launched by an external service provider.

The project Webpage is the central hub of information for internal and external communication as well as a tool for managing the target groups' database under User-twinning programme and Early Stage Researches (ESR) support.

The content of the website includes information on activities under each WP, key research results, information on TNA, twinning and training activities for both experienced users as well as ESRs.

The website will be updated periodically with materials generated during the project lifetime and beyond.
